

# PIEUVRE LUMIÈRE

## Comprehensive Business Plan - Revised

Guernsey, Channel Islands

---

### EXECUTIVE SUMMARY

Pieuvre Lumière will operate as a dual-focus business providing high-quality architectural models with integrated lighting systems alongside a complementary line of 3D-printed designer lamps and interior products. Based in Guernsey and initially targeting the island's 20 architectural firms and affluent homeowner market, the business will leverage existing 3D printing equipment (Form 1 SLA printer with replacement stepper, Wanhao i3 clone requiring recommissioning, and Ender 5 Plus) to create unique products that showcase both technical expertise and aesthetic innovation.

Founded by a Mechatronics/Robotics Engineer with an interest in architecture and design, Pieuvre Lumière will establish market presence through exceptional quality and local service. The designer lamp line provides revenue diversification, showcases lighting expertise to architectural clients, and creates multiple touchpoints with the design community. This revised business plan presents a conservative growth strategy with realistic projections, building from a home workshop to a recognized brand in architectural visualization and designer lighting over a 6-year period.

---

## 1. COMPANY OVERVIEW

### 1.1 Mission Statement

To revolutionize architectural visualization through innovative physical models that seamlessly integrate interactive technology, enhancing the design and presentation process for architects and their clients. Like our namesake - the octopus (pieuvre) that adapts intelligently to its environment with multiple capabilities, combined with illumination (lumière) - we bring adaptability, intelligence, and illuminating insights to architectural visualization.

### 1.2 Vision Statement

To evolve from a specialized model-making service into a comprehensive architectural innovation firm that leads the industry in integrating physical modeling, digital visualization, and interactive technology. Our dual focus on architectural visualization and designer lighting products creates a unique position in the Guernsey market, combining technical expertise with aesthetic innovation.

### 1.3 Company Structure

- **Name Origin:** "Pieuvre Lumière" combines the Guernesiais word for octopus (made famous by Victor Hugo during his time in Guernsey) with the French word for light, reflecting both our local heritage and our specialty in interactive lighting
- **Legal Structure:** Sole proprietorship for first 24 months, then evaluate transition to Limited Company
- **Location:** Home-based workshop throughout initial phases, commercial space only when justified by revenue
- **Key Personnel:** Founder (Mechatronics/Robotics Engineer)
- **Business Focus:** Dual focus on architectural models and designer 3D printed lighting/interior products

## 1.4 Core Values

- Technical excellence and precision
  - Sustainable business growth
  - Client-centered service
  - Realistic expectations and delivery
  - Continuous improvement
- 

## 2. MARKET ANALYSIS

### 2.1 Target Market

- **Primary:** 20 identified architectural firms in Guernsey
- **Realistic Initial Target:** 2-3 architectural firms willing to trial new supplier
- **Secondary Market:** Interior designers, high-end furniture retailers, and boutique home decor shops
- **Direct-to-Consumer:** Affluent homeowners interested in unique designer pieces
- **Long-term:** Expansion to Jersey and UK markets

### 2.2 Market Size and Realistic Potential

- **Architectural Market:** 20 firms in Guernsey
- **Interior Design Market:** 10-15 interior designers/decorators in Guernsey
- **Retail Opportunities:** 5-8 high-end home furnishing stores
- **Direct Sales Potential:** Guernsey's affluent population (average house price £600k+)
- **Year 1 Target:** 2-3 architectural clients, 20-30 lamp sales
- **Year 2 Target:** 4-6 architectural clients, 100-150 lamp sales

### 2.3 Competitive Analysis

- **Current Suppliers:** Most firms likely use UK-based model makers
- **Shipping Disadvantage:** UK suppliers face 2-5 day shipping to Guernsey
- **Local Advantage:** Same-day meetings, quick revisions, no shipping costs
- **Initial Challenge:** Overcoming established supplier relationships
- **Strategy:** Win through superior service and gradual trust-building

## 2.4 Industry Trends

- Architectural firms increasingly cost-conscious post-pandemic
- Growing interest in sustainable practices
- Technology adoption varies widely among firms
- Local sourcing preference when quality matches external suppliers
- Rising demand for unique, artisanal home decor items
- Shift toward customizable and personalized interior products

## 2.5 Competitive Advantages for Designer Lamps

- **No Local Competition:** Currently no 3D-printed designer lighting in Guernsey
  - **Customization:** Can offer bespoke designs impossible with traditional manufacturing
  - **Quick Turnaround:** Local production means no shipping delays
  - **Price Point:** Competitive with imported designer lamps but with local service
  - **Eco-Appeal:** Can use recycled/sustainable filaments
  - **Technical Expertise:** Engineering background ensures functional, safe designs
- 

# 3. PRODUCTS AND SERVICES

## 3.1 Dual Product Line Strategy

### Architectural Model Services (Primary Focus)

- High-quality physical scale models
- Models with integrated lighting design
- Interactive lighting demonstrations
- Model maintenance and updates

### Designer Lighting & Interior Products (Secondary Line)

- 3D printed designer lampshades with unique geometric patterns
- Custom lighting fixtures for interior designers
- Decorative interior items (planters, sculptures, room dividers)
- Limited edition artistic pieces
- Bespoke designs for specific projects

### 3.2 Phased Service Introduction

#### Phase 1 (Months 1-12): Foundation

- Traditional architectural models
- Basic LED lighting integration
- Initial lampshade designs (5-10 core designs)
- Test market response to designer products

#### Phase 2 (Months 13-24): Product Development

- Enhanced architectural lighting features
- Expand lamp collection to 20-30 designs
- Introduce complementary interior items
- Develop online catalog for designer products
- Collaborate with local interior designers

#### Phase 3 (Year 3+): Full Integration

- Interactive architectural models
- Custom designer lighting commissions
- Showroom pieces for architects and designers
- Potential retail partnerships
- Design consultation services

### 3.3 Strategic Synergies

- **Cross-Marketing:** Architects who commission models may specify your lamps in projects
- **Showroom Effect:** Designer lamps demonstrate lighting expertise to model clients
- **Material Efficiency:** Same materials and equipment serve both product lines
- **Revenue Diversification:** Products provide income between model projects
- **Brand Building:** "Pieuvre Lumière" becomes synonymous with innovative lighting design

### 3.5 Initial Designer Lamp Collections

#### Coastal Collection (Guernsey-themed)

- "Rocquaine": Wave-pattern pendant inspired by local bay
- "Sark Light": Geometric interpretation of lighthouse lens
- "Fort Grey": Hexagonal design echoing Martello tower architecture
- "Tide Pool": Organic, flowing forms

#### Architectural Collection

- "Voronoi": Mathematical cell patterns for dramatic shadows
- "Helix": Spiral designs with dynamic light play
- "Grid": Minimalist cubic patterns for modern interiors
- "Tessellation": Interlocking geometric patterns

### Nature-Inspired Collection

- "Coral": Branching organic structures
- "Honeycomb": Hexagonal efficiency and natural beauty
- "Leaf Skeleton": Delicate vein patterns
- "Crystal": Angular, faceted designs

### Custom Options

- Personalized patterns (names, dates, coordinates)
- Size variations for different spaces
- Color options using different filaments
- Collaborative designs with interior designers

## 3.6 Product Pricing Strategy

### Architectural Models

- Year 1: £400-1,200
- Year 2: £600-2,500
- Year 3+: £2,500-5,000

### Designer Lighting Products

- Small Lampshades (bedside): £45-75
  - Medium Lampshades (pendant): £75-150
  - Large Statement Pieces: £150-400
  - Custom Designs: £200-600
  - Limited Editions: £300-800
  - Interior Accessories: £25-200
- 

## 4. TECHNICAL OPERATIONS

### 4.1 Equipment Status and Investment

#### Current Equipment Status:

- Form 1 SLA printer: Requires stepper replacement (part on hand)
- Wanhao i3 clone: Requires £100 recommissioning
- Ender 5 Plus: Operational
- Basic electronics workshop: Functional

### **Immediate Investment Required:**

- Wanhao recommissioning: £100
- Form 1 repair (labor only): £0 (DIY)
- Backup resin and materials: £200
- Workshop organization: £100
- **Total Equipment Investment: £400**

### **Year 1-2 Equipment Plan:**

- Maintain existing equipment
- Build resin printer enclosure for safety
- Invest in post-processing tools
- Plan for SLA printer replacement/upgrade in Year 2

## **4.2 Realistic Production Timeline**

### **Months 1-3: Setup Phase**

- Complete all printer repairs
- Establish material suppliers
- Create workshop workflow
- Develop first portfolio pieces

### **Months 4-6: Portfolio Development**

- Create 3-4 demonstration models
- Document capabilities
- Develop basic lighting integration
- Refine production processes

### **Months 7-12: Early Client Work**

- First client projects
- Process refinement
- Quality control establishment
- Gradual capability expansion

## **4.3 Designer Lamp Production Advantages**

- **Equipment Utilization:** Printers run overnight for lamp production
- **Material Efficiency:** Lampshades use less material than architectural models
- **Scalability:** Can pre-produce popular designs during quiet periods
- **Quality Control:** Simpler than complex architectural models
- **Design Library:** Build catalog of proven designs for quick production
- **Customization:** Easy to modify existing designs for bespoke orders

#### 4.4 Technical Development Approach

- Start with geometric patterns that print reliably
  - Test different infill patterns for light diffusion
  - Develop signature design elements
  - Create modular systems for easy customization
  - Build complexity based on market response
- 

## 5. MARKETING AND SALES STRATEGY

### 5.1 Conservative Market Approach

Position initially as a reliable local alternative to UK suppliers for architectural models, while simultaneously building a reputation for unique designer lighting products that showcase technical and aesthetic capabilities.

### 5.2 Dual Marketing Strategy

#### Architectural Model Marketing

- Direct B2B approach to architectural firms
- Portfolio demonstrations
- Relationship building through quality service
- Referral-based growth

#### Designer Lighting Marketing

- Instagram/Social media presence showcasing designs
- Pop-up displays at local markets/events
- Partnerships with interior designers
- Consignment in select boutiques
- Online store (Year 2)

### 5.3 Cross-Promotion Opportunities

- Display designer lamps in architectural model presentations
- Offer architects special pricing on lamps for their projects
- Use lamp sales to introduce model-making services
- Create cohesive brand identity around innovative lighting

## 5.4 Marketing Budget (Revised)

### Year 1: Dual Focus

- Professional photography: £300
- Basic website with product gallery: £200
- Business cards and materials: £150
- Portfolio models & lamp prototypes: £500
- Market stall fees (4 events): £200
- Social media advertising: £150
- **Total Year 1 Marketing: £1,500**

### Year 2: Expansion

- Website with e-commerce: £800
- Professional product photography: £400
- Trade show participation: £600
- Marketing materials update: £300
- Social media advertising: £400
- **Total Year 2 Marketing: £2,500**

## 5.4 Sales Process

1. Initial contact through referral or direct approach
2. Portfolio presentation
3. Understanding project requirements
4. Competitive quote with clear timeline
5. Regular updates during production
6. Professional delivery and follow-up

---

## 6. ORGANIZATIONAL STRUCTURE AND GROWTH PLAN

### 6.1 Realistic Staffing Timeline

#### Years 1-2: Solo Operation

- Founder handles all aspects
- Outsource only accounting (£50/month)
- Focus on skill development and efficiency

### **Year 3: First Hire Consideration**

- Only if consistently at capacity
- Part-time model finishing assistant
- 20 hours/week at £12/hour
- Annual cost: £12,480

### **Years 4-5: Gradual Expansion**

- Second hire only if revenue exceeds £100,000
- Focus on specialized skills you lack
- Maintain lean operations

### **Year 6: Evaluate Structure**

- Consider full-time employees if justified
- Assess incorporation benefits
- Plan based on actual growth, not projections

## **6.2 Skill Development Priority**

1. Model-making craftsmanship
2. Client relationship management
3. Basic lighting design
4. Interactive system development
5. Business management

---

## **7. FINANCIAL PROJECTIONS (CONSERVATIVE)**

### **7.1 Revised Startup Costs**

|                                  |        |
|----------------------------------|--------|
| Equipment Repairs and Setup:     | £400   |
| Initial Materials Inventory:     | £600   |
| - Model materials:               | £300   |
| - Lamp materials:                | £300   |
| Lamp Design Development:         | £200   |
| Basic Marketing Materials:       | £800   |
| Workshop Safety Equipment:       | £200   |
| Software Subscriptions (Year 1): | £300   |
| Legal and Administrative:        | £300   |
| Operating Capital (3 months):    | £1,500 |
| Contingency (20%):               | £860   |
| -----                            |        |
| Total Startup Investment:        | £5,160 |

## 7.2 Conservative Revenue Projections

### Year 1: Market Entry

- Architectural Projects: 4-8
- Average Revenue per Project: £600-800
- Architectural Revenue: £2,400-6,400
- Designer Lamp Sales: 20-30 units
- Average Lamp Revenue: £80
- Lamp Revenue: £1,600-2,400
- **Total Revenue: £4,000-8,800**
- Material Costs (30%): £1,200-2,640
- Other Expenses: £2,000-3,000
- **Net Result: -£200 to +£3,000**

### Year 2: Building Momentum

- Architectural Projects: 8-15
- Average Revenue per Project: £1,000-1,200
- Architectural Revenue: £8,000-18,000
- Designer Lamp Sales: 100-150 units
- Average Lamp Revenue: £100
- Lamp Revenue: £10,000-15,000
- **Total Revenue: £18,000-33,000**
- Material Costs (25%): £4,500-8,250
- Operating Expenses: £6,000-8,000
- **Net Profit: £7,500-16,750**

### Year 3: Establishing Presence

- Architectural Projects: 20-30
- Average Revenue per Project: £1,500
- Architectural Revenue: £30,000-45,000
- Designer Lamp Sales: 200-300 units
- Average Lamp Revenue: £120
- Lamp Revenue: £24,000-36,000
- Interior Product Revenue: £5,000-10,000
- **Total Revenue: £59,000-91,000**
- Costs (materials, potential part-time help): £29,500-45,500
- **Net Profit: £29,500-45,500**

### **Years 4-6: Steady Growth**

- Architectural projects: 40-60 annually
- Designer products: 500+ units annually
- Combined revenue potential: £150,000-250,000
- Target net margins of 35-40%

### **7.3 Break-Even Analysis**

- Monthly Fixed Costs (Year 1): £200-300
- Variable Costs: 30-40% of revenue
- Break-even: 1 project per month at £800
- Realistic achievement: Month 8-10

### **7.4 Cash Flow Management**

- Require 30% deposits on all projects
- Net 30 payment terms
- Maintain 3-month expense buffer
- Reinvest 70% of profits in Years 1-2

---

## **8. IMPLEMENTATION PLAN (REVISED)**

### **8.1 Months 1-3: Foundation**

- Week 1-2: Repair all equipment
- Week 3-4: Source reliable suppliers for both model and lamp materials
- Week 5-6: Design first 5 lampshade patterns
- Week 7-8: Create first architectural portfolio model
- Week 9-10: Produce lamp prototypes and test designs
- Week 11-12: Refine workspace for dual production

## **8.2 Months 4-6: Product Development**

- Create 2-3 additional architectural showcase models
- Develop 10-15 lamp designs in various sizes
- Test lamp products with friends/family for feedback
- Build website with portfolio and product gallery
- Research both architectural firms and interior designers
- Participate in first local craft market

## **8.3 Months 7-9: Market Launch**

- Contact 5 most promising architectural firms
- Approach 2-3 interior designers with lamp samples
- Launch social media presence for designer products
- Secure 1-2 architectural trial projects
- Place lamps in 1-2 local boutiques on consignment
- Refine product line based on early feedback

## **8.4 Months 10-12: Establish Operations**

- Complete first architectural projects excellently
- Analyze lamp sales data and adjust product mix
- Develop seasonal lamp collections
- Build email list of lamp customers
- Plan Year 2 expansion for both business lines

## **8.5 Year 2: Controlled Growth**

- Expand client outreach
- Introduce enhanced services gradually
- Maintain quality standards
- Build financial reserves

## **8.6 Years 3-6: Sustainable Expansion**

- Growth based on actual demand
  - Hire only when necessary
  - Develop advanced features
  - Consider geographic expansion
- 

## **9. RISK ASSESSMENT AND MITIGATION**

### **9.1 Primary Risks**

#### **Equipment Failure**

- Risk: Form 1 may fail again despite repair
- Mitigation: Budget for replacement by Year 2; maintain FDM capability

#### **Market Resistance**

- Risk: Firms reluctant to change suppliers
- Mitigation: Competitive pricing, exceptional service, patience

#### **Cash Flow**

- Risk: Project payment delays
- Mitigation: Deposits, diverse client base, expense buffer

#### **Technical Complexity**

- Risk: Interactive features too ambitious
- Mitigation: Phased development, proven technologies first

### **9.2 Additional Considerations**

#### **Lamp Safety and Compliance**

- Research CE marking requirements for lighting products
- Ensure electrical components meet safety standards
- Develop installation guides and safety documentation
- Consider product liability insurance
- Test heat resistance of materials thoroughly

#### **Intellectual Property**

- Develop unique design patterns
- Consider design registration for signature pieces
- Document creation process
- Build brand recognition around original designs

### **9.3 Contingency Plans**

- If Form 1 fails: FDM-only models initially, focus on lamp production
  - If architectural market slower: Emphasize designer lamp sales
  - If lamp sales exceed expectations: Consider dedicated lamp production space
  - If growth rapid: Maintain quality over quantity
- 

## **10. SUCCESS METRICS**

### **10.1 Year 1 Success Indicators**

- 2+ architectural clients established
- 4+ architectural projects completed
- 20+ designer lamps sold
- 2+ retail partnerships established
- Combined revenue of £6,000+
- Social media following of 200+

### **10.2 Year 2 Success Indicators**

- 4+ regular architectural clients
- 15+ projects completed
- 100+ lamps sold
- 5+ interior designer relationships
- £25,000+ combined revenue
- Introduction of custom lamp commissions

### **10.3 Long-term Success Indicators**

- Sustainable profit margins (35%+)
- Client retention rate >80%
- Recognized brand for designer lighting in Guernsey
- 30%+ revenue from product sales
- Expansion to Jersey market
- Showroom/studio space justified

---

## CONCLUSION

This revised business plan for Pieuvre Lumière presents a realistic dual-revenue approach combining architectural model-making with designer 3D-printed lighting products. This strategy offers several key advantages:

1. **Revenue Diversification:** Lamp sales provide steady income between architectural projects
2. **Brand Synergy:** Both products showcase lighting expertise and technical innovation
3. **Market Expansion:** Appeals to architects, interior designers, and direct consumers
4. **Lower Risk:** Product sales reduce dependence on winning architectural contracts
5. **Showcase Effect:** Designer lamps demonstrate capabilities to potential model clients

The shift from a generic 3D print farm to designer lighting products creates a more cohesive brand identity and higher profit margins. By maintaining conservative growth projections and focusing on quality in both business lines, Pieuvre Lumière can establish itself as Guernsey's premier source for innovative architectural visualization and designer lighting.

With realistic expectations, careful financial management, and a commitment to both technical excellence and aesthetic innovation, Pieuvre Lumière is positioned to illuminate both architectural models and interior spaces throughout the Channel Islands.
